

# Chemical Spraying Technology

## TECHNOFLOW

- ✓ Sustainable Production
- ✓ 6 Tanks for Production Versatility
- ✓ Ability to Feed 2 Washing Machines Simultaneously
- ✓ Stone-Free Washing Process with Enzymes
- ✓ Minimum Chemicals & Water & Energy Costs
- ✓ Minimum Production Costs at Stone Washing & Bleaching & Dyeing & Resining
- ✓ Easy to Operate (No Skilled Operators Required)
- ✓ Advanced Productivity & High Production Capacity
- ✓ Cost Effective
- ✓ Operator & Environment Safety
- ✓ Easy Installation & Low Maintenance & Long Lasting Operational Life
- ✓ Online Troubleshooting and Recovery with Remote Connection

TECHNOFLOW - TWIN SYSTEM

**KEY BENEFITS:**

**Chemical Spraying Technology:** Technoflow's unique and patented design mixes the enzyme and the softener with water and transfers it to the washing machine as a pulverised spray which ends up with maximum and homogenous penetration to the garment.

**Use of Enzymes-Stone Free Washing:** By creating a homogenous and efficient mixture of enzymes, it is definitely replacing the stone wash operation in a beneficial and sustainable way.

**Multi-Tank System:** Thanks to the unique and patented design of Technoflow, there are 6 different tanks designed for different chemicals to achieve maximum versatility in production.

**1 Technoflow for 2 Washing Machines:** Thanks to Technoflow's powerful three pumping system, it is capable of feeding two different washing machines simultaneously within the same process and the receipt.

EQUIPMENT	LENGTH (mm)	WIDTH (mm)	HEIGHT (mm)
TECHNOFLOW	1200	2155	1347
